Comments: I object to the approval of APS Oak Creek to Mc Guireville 69kV Transmission Line Project # 56977.

The reasons for my objections are as follows

Evidence from the recent California fires suggest the Eaton Fire started near electrical towers. In these times of climate devastation and extreme drought, it is unacceptable to proceed with a project that is an extreme fire hazard. This project may destroy our community and the lives of our residents.

The Kel Fox trail is a recreational area enjoyed by this community for hiking and biking. There Indian Petroglyphs, abundant wildlife and natural beauty along this trail. People in our community want open space to enjoy nature. That is the reason we live in Sedona.

These above ground power lines would be an eyesore and a health hazard to this community.
