Comments: To whom it may concern. My name is George Wilson, I live in Driggs Idaho. Ten years ago, I went to Austria and came across a group of older ladies 65+ that were riding E bikes on a mountain trail. I stopped and asked them what they were riding and they explained the entire concept and that it allowed them to enjoy the outdoors in ways they haven't been able to in 25 years. Europe took a completely different approach in allowing E bikes on public land and it seems to have worked well for them. I believe this approach of catering to the entire community and allowing E bikes would benefit the general public as opposed to not allowing E bikes, and only a select few of extremely well conditioned individuals having bike access. Thank you for your time.
