Comments: I do not believe allowing E-bikes on select trails is in the best interest of our trails system users. I do understand the popularity of E-bikes. We moved from an area that allowed E-bikes and witnessed quite a few conflicts in the short time they were allowed on trails. Do we have the resources to police the use of class 1 over class 2 and class 3? Do we have the resources to police which trails E-bikes are and are not allowed to ride? This is where conflicts arise as people stretch the rules.
