Comments: The concept of creating new trails for E use is confirmation you may have problems. When human powered mtn. bikes appeared in early 80's the triangle signs had hikers and bikers yielding to horse's and bikers yielding to both. Pedal assist is one thing but throddeing a moder is another. Mabey the sign now needs to become a square with assist yielding to everyone with more education about speed. The forest is not a race track. It's all about slowing down and taking in what's around you. You want to go fast, do it in the ORV area. We don't need new trails everytime a new user group wants to tear up the forest. You made this mistake with downhill bikers. Also I feel E use should not be used for fishing and hunting access except in ORV areas. Fair chase for all not the elite and entitled.
