Comments: We are loving our natural lands to death. If we don't take action to protect them, we WILL damage them so much that future generations can't enjoy them too. We must PROTECT America the Beautiful!!!

To do this, we need hard data on how our natural spaces are being used and how those uses are actually impacting our natural resources. The Forest Service needs more scientific data informing user capacity numbers. Data collection and analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of the river.

Habitat protection on the Flathead River is not something that can wait, and the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild.
