Title:

Comments: I studied environmental science and saw time and time again the effects of a mismanaged, overused, and abused landscape. We need to protect places like this in every way that we can. I am an avid outdoors enthusiast as well and sure there are places I would love to go rafting and camping but are unavailable to me because there are efforts being made to protect them. I understand that and respect it. Just because we limit our land use doesn't mean we have to stop all together. Please consider this effort to protect these beautiful lands and make an effort to save these beautiful landscapes so many have to be thankful for.
