Comments: In the 1960's my husband attended camp at Montlure during 4 different years. I have heard about this remarkable area all our 40+ years together. After the Wallow Fire, when environmental studies were needed, we contributed to assist that process. In the summer of 2022, he spent 6 weeks at the camp, helping to restore it with his carpentry skills. Then in the summer of 2023, we spent the entire summer in Greer allowing him to continue his repairs on Montlure Camp. By summer of 2024, we had made the decision to move to Greer permanently so he could also help with projects during the winter. This camp is important to the community of Greer, and to us.

A land swap would be a perfect sustainable, long term solution to ensure Montlure can continue offering transformative recreational experiences for generations to come.

It certainly impacted him that way, with life changing experiences when he was a young man, that continue to impact his life in his 80's.

PLEASE approve the land swap.
