Title:

Comments: Humans had everything they needed on Earth but over the years, humans have taken and taken from Earth but have done little to nothing to protect home Earth. It is natural to protect what you value. The idiots who run our planet only value money which is meaningless without Earth. We can not allow them to further kill the planet and all it life. We must protect Earth. Start here with habitat protection on the Flathead River; it is not something that can wait, and the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild. Give the agencies what they need to be successful, the Forest Service needs more scientific data informing user capacity numbers. Most importantly immediate action is critical to address wildlife displacement in Wilderness caused by current recreation numbers. I love the planets wildlife and their numbers are decreasing, without them humans will go into extinction, YOU MUST SAVE WILDLIFE! Immediate action is needed to reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness. The vast majority of use on the wild rivers should be allocated to public use, and commercial outfitting and money hungry guiding should be limited to only the level that is "necessary and "proper" as required by the Wilderness Act. Data collection and analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of the river. Please do your job and protect all natural life that does not include protecting wealth or making making for the rich. Immediate action is needed to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.
