Comments: To whom it may concern,

I commend the Forest Service for taking steps by proposing new regulations and increased monitoring of recreation use on the Flathead River, including the 87 miles that run through Wilderness. However, the proposed actions fall far short, failing to acknowledge current recreation impacts or address the significant threats to Wilderness already occurring in one of America's preeminent wild places. Please consider the following:

- * Data collection and analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of the river.

- * Immediate action is needed to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.

- * Habitat protection on the Flathead River is not something that can wait, and the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild.

- * The Forest Service needs more scientific data informing user capacity numbers.

- * Immediate action is critical to address wildlife displacement in Wilderness caused by current recreation numbers.

- * Immediate action is needed to reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness.

- * The vast majority of use on the wild rivers should be allocated to public use, and commercial outfitting and guiding should be limited to only the level that is "necessary and "proper" as required by the Wilderness Act.

Please protect Wilderness and wildlife in the Flathead Wild and Scenic River corridor, as required by the Wilderness Act.

Thank you,

-Donna Profeta
