Comments: The Flathead Comprehensive River Management Plan proposes a number of good actions, including: prohibiting parking and car camping on gravel bars; requiring containment of human waste within 200 feet of the river's edge; prohibiting drones; requiring a fire pan or blanket for campfires within or above the highwater mark; and noise level and group size limits.

However, the agency lists user capacity numbers, but provides no information on how these numbers were reached or data to show the actual user limit when considering the well-being of fish and wildlife and the experiences of other wilderness visitors.

The document also fails to provide information on impacts to Wilderness due to current recreation use, including the displacement of wildlife and waterfowl caused by rampant overuse, such as the endless stream of outfitting and guide services profiting from tours through the river corridor, and low-flying aircraft overhead. In just one example, the airstrip in Schafer Meadows results in multiple daily flights over the Middle Fork of the Flathead in the Great Bear Wilderness. One can only imagine the impact a busy flight pattern is having on wildlife in the Great Bear Wilderness.
