Comments: Dear USFS

I used to live in Montana and I ventured into the "Bob" several times backpacking and horse packing. It is a jewel of a wilderness. But I understand that like many wilderness areas it is getting overused in concentrated areas.

Habitat protection on the Flathead River is not something that can wait, and the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild.

The Forest Service needs more scientific data informing user capacity numbers.

Immediate action is critical to address wildlife displacement in Wilderness caused by current recreation numbers.

Immediate action is needed to reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness.

The vast majority of use on the wild rivers should be allocated to public use, and commercial outfitting and guiding should be limited to only the level that is "necessary and "proper" as required by the Wilderness Act.

Data collection and analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of the river.

Immediate action is needed to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.

I understand that many outfitters make a living on the wilderness resource of the Flathead River System but if it becomes too degraded these outfitters will be killing their own resource. Plus the wildlife, river and forests should have a say in this as they are the home of this great place called the "Bob". Thank you.
