Comments: For the greater good protection of habitat on the Flathead River is absolutely crucial now~ Bob Marshall Wilderness Complex demands preservation.

More scientific data informing user capacity numbers is essential to prevent wildlife displacement due to current recreation numbers. It is also necessary to reduce impacts to the Middle Fork of the Flathead from flights in and out of Schafer airstrip.

The vast majority of use on these wild rivers should be allocated to public use. Commercial outfitting and guiding should be limited to only the level that "necessary & "proper" as required by the Wilderness Act.

Data collection & analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of it.

Posthaste act to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.
