First name: Kenneth

Last name: Althiser

Organization:

Title:

Comments: *Habitat protection on the Flathead River is promptly needed, but the Bob Marshall Wilderness Complex must receive immediate action to preserve the wilderness quality.

*More scientific data informing user capacity numbers is a requirement for the Forest Service.

*Wildlife displacement in Wilderness areas is caused by the currently prolific numbers of recreational users, and wildlife displacement should be minimized.

*Flights in and out of the Schafer Airstrip within the Great Bear Wilderness are causing problems in the Middle Fork of the Flathead that must be addressed soon.

*The vast majority of use on wild rivers should be allocated to public use, and commercial outfitting and guiding should be limited to only the level "necessary and "proper" as required by the Wilderness Act.

*Data collection and analysis should involve the entirety of the Flathead River corridor, including a buffer zone of one-quarter mile to either side of the river.

*Immediate action is needed to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.
