Comments: Dear Forest Service,

The Flathead Comprehensive River Management Plan proposes a number of good actions, but fails to provide information on impacts to Wilderness due to current recreation use, including the displacement of wildlife and waterfowl caused by rampant overuse, such as the endless stream of outfitting and guide services profiting from tours through the river corridor, and low-flying aircraft overhead.

Habitat protection on the Flathead River is not something that can wait, and the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild.

The Forest Service needs more scientific data informing user capacity numbers.

Immediate action is critical to address wildlife displacement in Wilderness caused by current recreation numbers.

Immediate action is needed to reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness.

The vast majority of use on the wild rivers should be allocated to public use, and commercial outfitting and guiding should be limited to only the level that is "necessary and "proper" as required by the Wilderness Act.

Data collection and analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of the river.

Immediate action is needed to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.

Thank you very for your time and consideration.

Sincerely,

Claudia Hasenhuttl
