Comments: I am a retired NASA environmental engineer.manager and I have over 55 years experience tracking environmental issues. I am also a fond user of wilderness in our national forests. I am particularly concerned about the potential damage to the Bob Marshall Wilderness Complex due to recreational overuse.

Habitat protection on the Flathead River is not something that can wait, and the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild.

The Forest Service needs more scientific data informing user capacity numbers.

Immediate action is critical to address wildlife displacement in Wilderness caused by current recreation numbers.

Based upon known information, it is apparent that immediate action is needed to reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness. I find it very disturbing that an airstrip even exists in a wilderness, which is clearly not a appropriate use allowed under the Wilderness Act.

The vast majority of use on the wild rivers should be allocated to public use, and commercial outfitting and guiding should be limited to only the level that is "necessary and "proper" as required by the Wilderness Act.

Data collection and analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of the river.

Immediate action is needed to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.
