Comments: Immediate action is critical to address wildlife displacement in Wilderness caused by current recreation numbers. The vast majority of use on the wild rivers should be allocated to public use, and commercial outfitting and guiding should be limited to only the level that is "necessary and "proper" as required by the Wilderness Act. Data collection and analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of the river. The Forest Service needs more scientific data informing user capacity numbers.
