Title:

Comments: Do not let the Flathead river area - and a couple of thousand feet on either side of river - become like Venice, Italy or the Louvre in Paris... it is a Wilderness area and therefore good data needs to be collected and findings shared to keep the human use of the area in line with the needs of the wild denizens.

Also, reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness.

Mind your Wilderness Management plan.

Thank you for your attention.
