First name: Tracy

Last name: Callow

Organization:

Title:

Comments: Immediate habitat protection is needed on the Flathead River due to high recreation usage of the area. The Forest Service needs more scientific data informing user capacity numbers, including the entire Flathead River corridor 1/4 mile on either side of the river. Impacts must be reduced to the Flathead's Middle Fork caused by flights using the Schafer airstrip in the Great Bear Wilderness.

Thank you for your valuable time and consideration.
