Comments: The Forest Service's proposed actions per Flathead Comprehensive River Management Plan #56536, fall short, failing to account for current recreation impacts or address significant threats to Wilderness already occurring.

The Bob Marshall Wilderness Complex deserves immediate action to preserve and protect habitat on the Flathead River.

The Forest Service must include scientific data informing user capacity numbers.

Data collection and analysis must include the entirety of the Flathead River corridor, one-quarter mile to either side of the river.

Immediate action is required to address wildlife displacement in Wilderness caused by current recreation numbers.

Impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness must be reduced.

Commercial outfitting and guiding should be limited to the level that is "necessary and proper" as required by the Wilderness Act.

Steps must be taken to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.
