Comments: Habitat protection on the Flathead River is an urgent issue--not something that can wait--the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild.

The Forest Service needs more scientific data informing user capacity numbers.

Quick and thoughtful action is critical to address wildlife displacement in the Bob Marshall Wilderness caused by current recreation numbers.

Urgent action is needed to reduce impacts to the Middle Fork of the Flathead caused by flights coming in and out of the Schafer airstrip in the Great Bear Wilderness.

The vast majority of use on wild rivers should be allocated for public usage; commercial outfitting and guiding should be limited to only the level that is deemed "necessary and proper" as required by the Wilderness Act.

Data collection and analysis must include the entirety of the Flathead River corridor, one-quarter mile to either side of the river.

Urgent action is required to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.
