Title:

Comments: Habitat protection on the Flathead River is not something that can wait, and the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild.

The Forest Service needs more scientific data informing user capacity numbers.

Immediate action is critical to address wildlife displacement in Wilderness caused by current recreation numbers.

Immediate action is needed to reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness.

The vast majority of use on the wild rivers should be allocated to public use, and commercial outfitting and guiding should be limited to only the level that is "necessary and "proper" as required by the Wilderness Act.

Data collection and analysis needs to include the entirety of the Flathead River corridor, one-quarter mile to either side of the river.

Immediate action is needed to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.

TAKE ACTION

Please note: In the past, we've experienced issues with a Forest Service (FS) comment page working intermittently due to a FS internal server error. We hope that won't be the case during this public comment period, but if do you experience an issue, please try again, or contact the FS's project contact Chris Prew: 406-758-5322/Christopher.Prew@usda.gov

We apologize for any inconvenience.

Help us protect Wilderness and wildlife in the Flathead Wild and Scenic River corridor and around the country.
