Comments: To preserve the integrity and beauty of this area is critical! With trump threatening to destroy and bulldoze over our remaining natural areas, it is so important that we set aside this beautiful and important ecosystem. Wilderness should remain just that... Wild. I have hiked in this area during peak tourist season, and it was loud and crowded. Allow for people to enjoy this tract of wild space, but continue to impose strict limits on the number of people, number of fish harvested,etc. let's keep this wild and wonderful sanctuary pristine and protected for future generations
