Title:

Comments: Thank you for addressing some important issues in the Flathead Wild and Scenic River Corridor and the Bob Marshall Wilderness. That there are new regulations and increased monitoring of recreation use proposed: good. Not addressing current recreation impacts: not good. Prohibiting parking and camping on gravel bars, prohibiting drones, containing human waste within 200 ft of the river: good. Not addressing overuse of for-profit outfitter guide tours and low-flying aircraft from that Shafer airstrip in Wilderness: not good. More inclusion of more agency action is needed now. Also, please consider public education, signage on gravel bars and other. Yes, enforcement.
