Comments: The Forest Service needs more scientific data informing capacity numbers and action is critical to address wildlife displacement caused by excessive recreation numbers.

The forest Service should take action to reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness.

The vast majority of use on the wild rivers should be allocated to public use. Commercial outfitting and guiding should be limited to only the level that is "necessary and "proper" as required by the Wilderness Act.

Data collection and analysis should include the entirety of the Flathead River corridor, 1/4 mile either side of the river.

Action is needed immediately to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan.
