Comments: Commercial guiding needs to be limited on the Flathead. Guides are becoming more and more enabled in all outdoor activities. Prices out the locals, if you know what I mean. Permitting is not the right way to approach the issue either. If there is to be a permit to float there should also be amenities along the corridor such as bathrooms and water fill up stations. Major money would be generated on a permit system, I realize it's free and unlimited now, where would the funds be used?
