Comments: Hello,

I've packrafted on the North Fork of the Flathead River, from the border to Blankenship bridge. It was one of most incredible stretches of river that I've paddled.

I strongly support free, mandatory float permits to improve visitor use data without restricting access on all forks of the Flathead River. I also support encouraging and enforcing Leave No Trace ethics so that all waste is being packed out.

I understand the need to limit use. However, the proposed river carrying capacities are Draconian and far too low. Please consider increasing access.

Thank you for your time.

Jenna Walker
