Title:

Comments: I strongly support free, mandatory float permits to improve visitor use data without restricting access.

To protect the river resource I urge cessation of all for profit/commercial guided river trips.

To further protect the resource I urge cessation of the use of livestock for the use of transporting people to and from the rivers.

I suggest strict waste packout and firepan requirements to protect water quality and the environment, and recommend flexibility in firepan sizes and waste containment systems suitable for packrafters.

I recommend increased visitor experience monitoring to track congestion and river conditions.

I encourage transparency on how user capacities were determined and how private user input was considered.

I encourage the Forest Service to clarify how private paddlers are managed differently from outfitters.
