Comments: I attended your public info meeting and agree with your plan to collect data this summer to help with the draft. Having extensive experience as a commercial raft guide and recreational boater along with working in the Spotted Bear Ranger district these are my 2cents on what I see to move forward regarding preservation of the OrVs etc.

For the wilderness portions of the plan a on line permit (no lottery yet) that includes a wilderness ethics course and test that must be passed before they receive the permit. Also require a trowel or other toilet system . A fine system also for non compliance. I know it will be hard to enforce which brings up that there needs to be a larger river Ranger presence. Which will be hard given the budget constraints you face now.

It seems as though we have already reached the limit threshold for commercial user dayson Moccasin to W Glacier.

One last thing is dispersed camping at Blankenship which either needs to be cut back ,stopped entirely or have permanent outhouses to accommodate the number of campers.
