Comments: My comments-Thank you for allowing this input.

-Please require a carry-out system for human waste. It is awful to see the shrubs along these rivers filled with toilet paper. (Wag bags or toilet system.)

-Please give private parties equitable use when it comes time to limit #s

-Please give thought to educating people about usage impact & how to be a good steward of the river to maintain quality of water and quality of experience, especially if you are going to double the numbers allowed.

-Please include some upgrade of parking and infrastructure in order to accommodate the proposed increases, as well as look at riparian conditions, campsite deterioration, etc.)

-I support the idea of firepans/blankets, w size requirements adjusted according to the craft (a packraft vs a raft)

-I support NO camping on gravel bars.

-Voluntary permit system ok
