Comments: I bicycled through the Teton/Yellowstone area more than 40 years ago on existing paved roads. It was incredible -- and enough. This invaluable area does NOT need more "access" that can only harm the landscape! Say no to any additional RVs, ATVs, camping, fishing, hunting, mountain bikes, e-bikes, all of which degrade what everyone came to "enjoy" (that is, to "appreciate" nature, people trample the land, spook the animals, erode the fragile soil and destroy the streams). About 5% of the USA's territory is in its original state, INCLUDING Alaska. Ninety-five percent is enough destruction!
