Comments: I am sad and outraged that the Conecuh Forest would even be considered for oil and gas development. Besides the environmental harm that would inexorably result from such exploitation, it would take from Alabama and its people the sites that have provided recreation, joy reflection. The United States is the # 1 oil producer in a time when every effort should be made to finance alternative fuel and energy. This is an unnecessary and blatant effort to further enrich the oil industry to the detriment of everyone else.
