Comments: Regarding the Questa Red River Trail,

We are in strong support of a multi-use trail. This trail will give people with various degrees of physical ability access to a plethora of outdoor recreational opportunities in one of our states most beautiful and popular outdoor recreation destinations. This trail promotes health and wellness through outdoor recreation and we love it! Connecting Questa and Red River via trail will help to strengthen the outdoor economy of the region with increased visitor revenues. The trail should also provide increased conservation opportunities to the area by limiting the use of unofficial "social" trails and overall increased value of the opportunity created.

So many adaptive outdoor adventurers which we represent are thrilled to cycle the Questa to Red River!

Thank you for your consideration.

Dustin
