Comments: Thank you for the opportunity to comment on the project. As a resident of Santa Fe who enjoys recreating across the state including on many USFS trails, I wholeheartedly support this project. Trails provide a way for the public to enjoy our public lands using their own power in a cost-effective way, and this trail would be an excellent option for outdoor access in the region. It would also undoubtedly bring business to local gas stations, restaurants, breweries, stores, etc. which I would imagine local business owners and employees would welcome. The low relative cost of trail development in this area relative to the decades of multiples types of use it would provide make this project an excellent return on investment.
