Comments: I support this but more importantly I support allowing e-bikes on all trails. I don't own an e-bike but I believe it is a great way for those people who are not able to bike due to age or health reasons be able to experience the outdoors. I understand there is a fear that people will destroy trails and exceed safe speeds but on all the trails I have been on that allow both types of bikes I have never had a bad experience.

I do feel in general the BTFS is not very supportive of bikes on trails in general and I hope that will change.
