Title:

Comments: My name is Amber and I am a native born Arizonan. I am writing this letter on behalf of Montlure.

Montlure, located on Forest Service land in Greer, AZ, was established in the 1930's as a place for rest, retreat and reflection within the Presbytery community. It grew through the decades to include a yearly summer camp which has affected so many lives, creating long-lasting friendships, relationships, etc. that cannot be conveyed with enough emphasis in this letter.

The Wallow Fire of 2011 displaced Montlure, resulting in damage not only to the site but the beautiful Greer valley; a deep hurt felt in the hearts of many. Over the years, Montlure has worked diligently with the US Forest service to meet all requirements to regain access to the site. This includes hundreds of volunteer hours to maintain the site as well as professional services.

Montlure has been beyond impactful in my own life and countless more. It would be a shame for it to disappear due to paperwork and red-tape.

Thank you for your time and attention to this matter. Your assistance in helping Montlure Camp continue its impactful work for future generations is greatly appreciated.
