Comments: I support the use of e-bikes on all pass trails. It will decrease the amount of traffic on the pass and help with parking as well. It will allow people with disabilities to access these trails. It will allow people of all ages to ride trails. Please change the policy's to allow Teton pass trails, shadow mountain trails, munger mt trails and all motorized trails for e-bike use. I also think allowing e-bikes up cashe Creek over to game creek where the trail was first developed for vehicles. Thanks for listening... but I believe that e-bikes do not do anything more damage than regular bikes. They are just more fun and allow more people to use our forest and trails. Please consider that these bikes just make life more fun and accessible for all.

Thanks!
