Comments: This plan also fails to address the extinction risk facing the Northern Spotted Owl, which is suffering from a severe and rapid population decline, as well as the slower decline of the Marbled Murrelet population. It is essential the existing habitat protections of the Northwest Forest Plan be maintained and built upon, not weakened or watered down.

Thank you for considering these critical issues. Please protect mature and old-growth forests to preserve biodiversity, fight climate change, and ensure the recovery of vulnerable bird species.
