First name: Mike

Last name: Harkin

Organization: Murphy Cattle Co.

Title: Manager

Comments: We are completely in favor of mentioned proposal. The area described is in dire need of thinning. There is so much overgrowth it is nearly impossible to maneuver through, even on horseback. The water situation continues to worsen each year as springs are no longer running in many areas. Thinning the trees will significantly improve ground water and restore native vegetation.

Prescribed burns will diminish fire hazards and improve the over all health of the Forrest as well.
