Title:

Comments: My main concern and question is the OLD GROWTH. You changed the ages of Old Growth from 80 yrs to 120-150 years old with no explanation that I can find in any of your fancy news releases about the new plan.

There remains 20% Old Growth. You are attempting to take more. You are about to decimate the last remaining SpottedOwl habitat with the SOUTH FORK PROJECT in Siskiyou County. It's not the Barred Owl causing the crisis, it's LOSS OF HABITAT.

I believe that you are attempting a tree grab and using 'forest resilience' and 'climate resilience' as buzzwords to accommodate a fearful community.

Restore the original age of OLD GROWTH.

Sincerely,

Kathleen Dugan
