Last name: Whitehouse

Organization:

Title:

Comments: Any components to a NWFP amendment that weaken core protections for mature and old-growth forests and the suite of water quality, species habitat, and carbon storage values they provide should not move forward, while those components that strengthen the NWFP's commitment to Tribal sovereignty and inclusion, environmental justice, and beneficial fire use should move forward without being tied to increased logging in these vital forests. Do not weaken core protections - only strengthen them.
