Comments: I strongly urge you to Nix any components to a NWFP amendment that weaken core protections for mature and old-growth forests and the suite of water quality, species habitat, and carbon storage values they provide , while Support those components that strengthen the NWFP's commitment to Tribal sovereignty and inclusion, environmental justice, and beneficial fire use should move forward without being tied to increased logging in these vital forests.

Your attention to this most urgent matter would be much appreciated by all present & future generations of all species.
