Comments: I'm very concerned about what appears to be a lucrative plan for our Northwest Forests, favoring logging and other exploitative businesses. To open over 800,000 acres of old-growth and mature forests to logging and permanently locking existing mature forests from potential protection is fool-hearty, short sighted, and apparently politically motivated for short-term gain. The long term consequences are disastrous. Please stop this plan and rewrite it for protection of our forests rather than exploitation.
