Title:

Comments: I support 'Alternative 1' slightly more than the original 'Proposed Action' for this project. We also encourage the consideration of developing more accessible, entry level trails. I support the identified trail development in Shadow Mountain Area and Mosquito Creek. Though, the proposed amount of trail is not sufficient to meet the purpose and need outlined in the original proposal. I do not support eMBT on Teton Pass except for on Old Pass Road, I think all other trails should stay peddle only. I support June 15th - October 31st open season for eMTBs in the Horsetail and Munger Areas would be a sufficient to mitigate wildlife conflict while allowing a longer riding season than alternative 1. I support the designation and management of Class 1 eMTBS ONLY on all purpose-built, bike-optimized singletrack trails. I do not support Class 2 e-bikes or Class 3 e-bikes on any trail networks that are currently not open to motorized vehicles.
