Title:

Comments: Thank you for the opportunity to comment. I am writing in support of Alternative B which balances improved fire resilience in our forests, along with the protection of old-growth. Distinguishing between forest protection and management on our "drier" westside and "wetter" eastside forests will lead to improved outcomes for both.

I also support Alternative B's efforts to more fully include Northwest Tribes, specifically incorporating indigenous knowledge in decision-making and supporting co-stewardship.

Finally, I would like to ask for an increased focus on recreational areas and trails and their speedy restoration after the effects of climate change, such as fire, flooding, and landslides.
