Title:

Comments: Old growth trees must be protected. Those trees create a carbon sink which this earth badly needs now with the massive climate destruction that is happening now. Please, work with the 80+ tribes in the Oregon/Northern CA border. They are the stewards of this land. They always have been. This country needs to be working in conjunction with the tribes as their indigenous knowledge is more earth/eco friendly. Humans can't keep extracting from the earth. It is throwing the earth out of balance. This is serious. Cree prophecy: "Only when the last tree has been cut down, the last fish has been caught, and the last stream is poisoned, will we realize we cannot eat money".
