Comments: I am writing to you today regarding a the Tongass Draft Assessment findings

Dear Tongass Plan Revision,

With the current administration literally dismantling everything good in this world, it is more important than ever that precious, irreplaceable forests such as the Tongass remain protected. We are in a biodiversity crisis and not taking steps to repair the damage humans have already inflicted on our planet is ignorant and self destructive. Please be smart enough to put a stop to the destruction at least in this one small corner of the world.

Sincerely,

Mrs. Gretchen Bennett
