Comments: I have been an advocate for Old Growth forests for 40 years. The idea that these incredible filters being removed for money is beyond ridiculous. There is ever increasing evidence of how they contribute to the wellbeing of life. At this critical time of hotter and hotter temperatures on Earth, please don't exacerbate it by logging this forest.

Any components to a NWFP amendment that weaken core protections for mature and old-growth forests and the suite of water quality, species habitat, and carbon storage values they provide should not move forward, while those components that strengthen the NWFP's commitment to Tribal sovereignty and inclusion, environmental justice, and beneficial fire use should move forward without being tied to increased logging in these vital forests.
