Last name: Kennedy

Organization:

Title:

Comments: I support Alternative B: This option strikes a good balance between preserving old-growth forests and improving fire resilience. I support new protections for previously unprotected old-growth forests and changes to improve the management of dry, eastside forests.

Tribal inclusion: Integrating Tribal knowledge into the planning process is essential, regardless of what course of action the Forest Service chooses.

Recreation: We support language in the proposed amendment to minimize the impact of climate change on recreation, but recreation needs to be more thoroughly incorporated into the final plan. This presents a great opportunity to share your own experiences to highlight why these forests matter to you and how recreation and climate-smart management can go hand in hand.
