Comments: Good people at the Forest Service,

I have been a citizen and business owner of southern Oregon for over 35 years. Our family harvest wild medicinal plants, roots and fungi from public and private lands, and employ several local people. Our work depend on healthy and diverse forests, and for some of the species we harvest, on old growth forests.

I have the following comments:

Please retain all of the Tribal inclusion plan components analyzed in the DEIS. I support elements of the proposed amendment that include a beneficial fire approach and support of Indigenous cultural burning and co-stewardship agreements.

I am concerned that the Forest Service's proposed amendment to the NWFP weakens protections for our region's older forests, clean water, and wildlife habitat. If enacted, these changes would significantly increase logging levels across our public forests, open mature and old-growth trees to commercial logging, and sideline the protections that communities, wildlife, and ecosystems depend on. Preserving biodiversity and connected wildlife habitat across the region should be a core principle of this forest plan amendment.

Fire resistance and resilience can be bolstered by preserving and restoring mature and old-growth forests. Fuels and fire management should focus on the home ignition zone and on non-commercial treatments and beneficial fire use, not commercial logging. Indigenous cultural burning and wildland fire use should be prioritized.

Commercial logging for fuel reduction can negatively impact wildlife habitat, remove large fire-resistant trees, introduce invasive species, and create hazardous fire conditions. Standards must ensure that fuel reduction is both needed and effective before logging is allowed.

The amendment should recognize the wide variety of social and economic benefits national forests provide for local communities and the region as a whole - not just timber, but also clean water, healthy and diverse wildlife, climate stability, quality of life, and outdoor recreation opportunities.

Thank you,
Kari Rein
