Title:

Comments: Dear Management: In January 2025, I received your letter on plans to reduce wildfire hazards - which I agree is necessary - increase conifer growing space - how? does this mean cutting down aspen and birch? I oppose taking too many! As for all the rest of the rest of the proposals, they cover a lot of what is not only expensive, but unnecessary and take away what the beautiful and wildness of the Black Hills area. Most of these things are not needed - and some are impossible! Sounds like a money maker for some and harmful to the natural beauty of the Hills!!!

Most I oppose!

Carolyn Stanley
